Zainul Faris V K

JUNIOR PYTHON DJANGO DEVELOPER

62381 53761 | zainulfaris40@gmail.com | LinkedIn | GitHub | Portfolio

PROFESSIONAL SUMMARY

Python Django Developer with professional experience contributing to the development and deployment of a database-backed accounting management application. Hands-on experience with Python, Django, Django ORM, MySQL, JavaScript, HTML, CSS, Bootstrap, and AJAX. Built a Django-based Hospital Management Application with patient, doctor, and admin workflows, role-based authentication, appointment scheduling, and email notifications. Currently working in software testing, bringing practical experience in debugging, defect analysis, regression testing, and release validation.

TECHNICAL SKILLS

Programming: Python, JavaScript, TypeScript, SQL

Backend & Web: Django, Django ORM, REST/API concepts, HTML5, CSS3, Bootstrap, AJAX

Database: MySQL

Development & Collaboration: Git, VS Code, debugging, production issue resolution

Quality & Testing: Functional Testing, Regression Testing, STLC, Test Case Design, Bug Tracking, Defect Reporting, Playwright

Additional: Machine Learning, Computer Vision, YOLOv8, Serial Communication

PROFESSIONAL EXPERIENCE

Software Tester | ZilMoney | Manjeri, India | 04/2026 – Present

- Tested web application features end-to-end using STLC practices, including requirement analysis, test case design, execution, defect identification, and reporting.
- Performed functional and regression testing across application workflows and verified bug fixes before release.
- Reproduced application issues, communicated defects clearly, and collaborated with development and product workflows to validate fixes.
- Developed practical test automation skills using Playwright and TypeScript on real application scenarios.

Python Full Stack Developer | Altos Technologies | Kochi, India | 09/2025 – 04/2026

- Assisted in developing and deploying an accounting management system using Python and Django, contributing to features from development through release.
- Worked with Django ORM and MySQL to support database-backed application workflows.
- Used JavaScript, HTML, CSS, Bootstrap, and AJAX while implementing and maintaining web application features.
- Fixed defects and improved existing features in a live production application to support application reliability.
- Collaborated with the development team to understand requirements, implement changes, troubleshoot issues, and support releases.

Graduate Trainee | Revertech IT Solutions | Kochi, India | 05/2023

- Completed industry training in Python and Machine Learning.
- Built a housing price prediction model using real Bengaluru housing datasets.

PROJECTS

Hospital Management Application | Django, Python, Django ORM, MySQL, AJAX

- Built a Django-based hospital management application with separate patient, doctor, and admin workflows and role-based authentication.
- Implemented appointment booking with time-slot management, appointment history, profile updates, and database-backed workflows using Django ORM and MySQL.
- Added email notifications for user registration and appointment confirmations and used AJAX for dynamic web interactions.

Real-Time Landslide Detection and Alerting System | Machine Learning, Wireless Sensor Network

- Developed and applied machine learning models for landslide detection using data collected through a Wireless Sensor Network.
- Integrated the machine-learning detection workflow with a broader web-connected monitoring and alerting system.
- The project received a Best Project Award at an IEEE Symposium (Malabar Subsection).

Smart Dog Repellent System | Computer Vision, YOLOv8

- Developed a computer-vision-based system using YOLOv8 for real-time dog and object detection.
- Implemented serial communication to connect the detection workflow with the hardware response mechanism.

EDUCATION

Bachelor of Technology (B.Tech.) in Information Technology | Government Engineering College Palakkad | 11/2021 – 06/2025 | CGPA: 7.9
